The Author of the National Hymr Tells How He Came to Write it-Columbian Liberty Bell at Chicago.

BOSTON, April 3.-The people of Boston are engaged in presenting a fitting testi-monial to Rev. Samuel F. Smith, the wontai to Rev. Samuel F. Smith, the venerable author of the national hymn, "America." A reception in Music Hall this afternoon was presided over by Gov. Greenhalge. Among the speakers were ex-Gov. John D. Long, Commander Thayer of the G.A.R., and Rev. Dr. Lorimer. Dr. Smith made an address, telling how he appeared to write the national hymn, and happened to write the national hymn, and he shook hands with scores of well-wishers. The feature of the exercises was the singing of "America" by a chorus of 200 Boston school chiluren.

AT CHICAGO. CHICAGO, April 3.—The Columbian Liberty Bell was rung today at mon in honor of Rev. Samuel Francis Smith, au-thor of "America." The ringing was done by a committee of school-children, representing each State and Territory.
Immediately after the ringing all united in singing "America," and a telegram was sent to Music Hall, Boston, where the ain celebration was in progress.

Associated Press Lease-wire Service.
CHICAGO, April 3.—Complete returns give George B. Swift for Mayor a plurality of 41,110, the largest ever known here in a similar contest. The civil service law was carried by a majority of 45,-570. The other candidates on the Repub-lican city ticket were all elected, although ticket. The Republicans also made a clean sweep of town offices, south, north and west and in the annexed districts. town of Lake, Stockyards district, one of the supposed Democratic strongholds, the Republican landslide was remarkable. The election gives the Republicans com control of the City Council, which will contain fifty Republicans and only eighteen Democrats. Dr. Holmes, the People's Party candidate for Mayor, received 14,000 votes, or less than half as many as were polled by the third party

The plan of campaign of the Democratic candidate for Mayor, Frank Wenter, was to cut into the German-Republican vote, and on this theory he expected to be and on this theory he expected to be elected. An examination of the returns show that he did get some German-Republican yotes, but the Irish Democratic votes which he lost more than offset the gains among the Germans. The Bohemians, Poles and Italians apparently deserted him. The greatest reinforcement that Swift and the Republicans received was from the vote of the laboring class. Many of those who voted the People's Party ticket last fall went to the Republicans.

Wenter declined to discuss the result except to say: Evidently the people did not want another Desperation Mayor at this time." Mayor Hopkins, who is a Democrat, was apparently not surprised over the result. "We have carried civil service," he said, with a twinkle in his eye

A HUNG JURY.

IT MAY NOT HANG THE TWO TAYLOR BROTHERS.

A Report that Talesmen Were Bribed Causes Excitement at Carrollton The Town Full of Wouldbe Lynchers.

ST. LOUIS, April 3.—A special to the Post-Dispatch from Carrollton, Mo., says that when the jury before which was tried the case of the State vs. Wiliam George Taylor, for the murder of Meeks family, retired last night, it Meeks family, rearred last man announced that they would not begin de-liberating on a verdict until this morning. Up to 2 o'clock this afternoon they had made no report, and nothing has come from the jury-room to indicate how they from the jury-room to indicate how stand. The fact that they have no reached a conclusion indicates that

stand. The fact that they have not yet reached a conclusion indicates that they are not all for conviction.

There are ugly rumors on the streets today, and the town is full of men from Lynn and suburban counties who believe the Taylors are guilty, and will not quietly accept any other verdict. The rumor most inciting to the organization of a mob is that two of the jurors have been bribed, having been paid \$1500 to prevent conviction if they cannot bring about an acquittal. This story is in every mouth and finds general credence.

The fact of the bribery, it is said, leaked out this way: One of the men now on the jury approached one of the panel of forty jurors before the pre-emptory challenges were made and offered him \$750 to hang the jury in event they were both selected to try the case.

LATER.—The jury at a late hour tonight is still out, and there is apparently no prospect of their reaching a verdict. It is rumored that the jury now stands 11 for conviction and 1 for acquittal. There is no telling how long the Judge will keep them out—possibly until next Sunday. The Prosecuting Attorney is investigating the report that there has been an inducement offered to some member of the jury to prevent a conviction. If this fact can be positively affirmed the Judge will impanel a special jury to investigate. Feeling is running high. The Taylor brothers are in better spirits, and evidently regard the delay as favorable to their cause.

MILLVILLE (N. J.,) April 3.—Nearly six hundred tramps, who are unable to b-tain work on the oyster-boats have taken possession of the towns of Bivaive and, Port Norris. The township authorities are unable to cope with them. It may become necessary to call upon Sheriff Shinn of Cumberland county to drive the despera-loes away. The men were brought her to find employment during the oyster-planting season, which has just opened and which will continue until June. They are made desperate by hunger, and are so bold that they enter houses in day-light and rob them of all the food they can find. The wives and daughters of the oyster men, all of whom are away at work in the daytime, are openly insulted on the streets and in their homes. Trouble is feared between the oyster-men and the owners of riparian grounds. If the seed oysters give out in the natural beds in oysters give out in the natural beds in Delaware Bay, many captains of the 1000 boats at work declare they will dredge on riparian grounds. That means the firing of the shore batteries, which are ready for effective work. Capt. John Blixard of Bivaive left that town, with the avowed intention of dredging on riparian grounds, with the Stars and Stripes flying from the musthead of his schooner, the Anna Maria. Before leaving, Capt. Blizzard pointed to the flag, and said:

planting got a fairly good start before whiter set in and was rarely without the protection of covering of snow during the prevelance of extreme weather. The percentage of plant destroyed by freezing or floods is very little. But little damage was done by the drouth.

The average condition is 96 points for April 1, a remarkable percentage, and promises a large yield if conditions remain favorable. In the heaviest wheat-growing countries, the prospect is most encouraging. The amount of old wheat in the hands of the producer on April 1 is not more than 14 per cent. of the crop harvested last season. But about 1 per cent. of the wheat harvested was fed to cattle, sheep and hogs last fail and winter. There is no further information of the exclusive fattening of any animals on wheat.

LONDON, April 3.—(By Atlantic Cable.)

Every available inch of Old Bailey was occupied this morning when the hearing of the libel suit brought against the Marquis of Queensbury by Oscar Wilde was opened before Justice Collins. Wilde charges the Marquis of the Persuary 23 and Associate with Jesuing on February 23 and Marquis with leaving on February 28 an uncovered card at the Albemarle Club on which was written certain foul epithets. and secondly, that the libel was true and was published for the public good.

The Marquis seemed unconcerned and, replying to questions, spoke quietly and clearly. Sir Edward Clarke, formerly spicitor-General, in opening the case said the card left at the Albemarie Club for Wulde was one of the visiting cards of the Marquis of Queensbury. Continuing, the counsel said the gravest issues had been raised, as the defendant in his pleadings alleged that the plaintiff had for some time solicited persons named to commit

Certain letters advanced by the plaintiff to Lord Alfred loughts, second son of the Marquis of usensbury, were brought to the plaintiff y a man who said he was in distress and vide gave him 120 with which to pay its passage to America. Another letter as handed Beerbohm Tree, the actor, the gave it to the plaintiff.

Counsel then recounted the facts already known in the case, showing that yield, who had recently returned from lighers, drove up to the Albemaria Clubbout 5 pm. February 28, and on entering as harded an envelope by the hall pores, Sidney Wright, who said: "Lord usensbury desired me, sir, to hand this o you when you came to the club."

Inside the envelope plaintiff found a ard on the back of which was the date, 30, 18, 2, 1895, and on this card were written certain foul epithets which owned Shabasis of the suit.

Oscar Wilde was called. He languidly rose from the solictor's table where he as seated and entered the witness-box. As pislariff was faultiessly dressed in a lack frock coat, and carried his gloves in lis hand, showing fingers covered withings, He was very pale, but seemingly omposed. Interest in the case was increased when it Edward Clarke, upon finishing the direct examination, turned the witness over to. E. H. Carson, Q. C. M. P., counsel for the Marquis of Queensbury, for cross-examination. Carson began the presentation of the case for the Marquis by reading passages from "Dorian Gray." one of Ostar Wilde's novels of modern life to show that the author upheld sodomy, the plaintiff following coussel with a copy of the book and laughing at Carson's insinuation.

Carson, addressing plaintiff, asked: "Do you think the description of "Dorian Gray," given on page 6 is a moral one?" "Yea," replied Wilde, "just what an artist would notice ip a beautiful personality." "Did 'you ever adore as madly as described in 'Dorian Gray' any person of the male set younger than yourself?" was the next question.

#### THE INCOME TAX.

The Returns Coming in with Very Little Friction.

WASHINGTON, April 3.—The in returns are coming in far beyond the ex-pectations of the officials. To save time and avoid complications, collectors were instructed to classify and send in the reinstructed to cassing and send in the re-turns on the 10th of each month, and there-fore no reports have been received of a date later than March 10. Nevertheless, 1000 returns have already been received and are being verified and recorded. It is ese returns ma prior to March 10, represent at least \$1,500,000 of the income tax, and the actual amount returned to April 1 will aggregate \$15,000,000.

It is not expected the returns to any considerable number will be made before April 8 or 9, five days before the time limit expires, hence the showing is exceedingly gratifying to those having the matter in charge. Another matter of congratulation is the sittle difficulty being experienced by the taxpayers in filling out their blanks. All things considered, the work of collecting the tax is going forward with very little friction. It is expected that at least \$20,000,000 of income tax will be collected by June I, the close of the fiscal year. Officials do not express any doubts that the Supreme Court will sustain all important features of the law, if not the entire act as it stands, and are pushing the work as rapidly as is consistent with accuracy. It is not expected the returns to any

as far as possible, while still making it plain that he United States could not be regarded as having any proper interest in the matter.

So, as it stands, the British government still insists upon its absolute title and right to occupy all the territory to the castward of the Schoemberg line, while professing a willingness to submit to arbitration its claim to the lands lying west of that line. This was the offer made to Venezuela years ago, and it has not been modified in any respect since, notwithstanding Mr. Bayard's effort. It has been intimated that the United States might acquire a right to intervene in behalf of Venezuela by decfaring a protectorate over that country, with the assent of this country, and behind this suggestion is at least one of the great European countries, who would be glad to have its relations with the disturbed countries of South and Central America placed on a stable basis, so that it might look to some thoroughly-responsible, highly-civilized government to insure the permanency of trade and prevent frequent revolutions. But to concede the necessity for such a protectorate as a prerequisite to interfere to prevent the acquisition of American territory by a European power, would amount to a renunciation of the Monree doctrine by the United States, and this cannot be contemplated by the administration.

There are indications that the British foreign officials are willing to discussion obtained from Venezuela of lands in that territory, are being watched with intense in that territory. TOPEKA (Kan...) April 3.—The committee appointed by Gov. Morrill to investigate Warden Chase of the penitentiary resumed its work this afternoon.

The first witness for the State was Sadie Davis, a colored woman. She swore that Chase was a frequent visitor to Matron Williams's room and that Miss Williams often met Chase at the door attired only in a wrapper and stockings. Asked by Attorney Waters if she ever spoke to Miss Williams about her scant attire she replied: "One day I told her that she did not have sense enough to flag a handcar."

Mattie Johnson, also colored, corroborated the Davis woman's story. Mr. England, the penitentiary physician, testined Miss Williams had resided at Meriden, where her reputation was bad. Adjourned until tomorrow.

NEW YORK, April 2.—Ex-Gov. Hogg of Texas is in the city. In a recent interview he said he was justified in signing the requisition for John D. Reckefeller.

"I simply acted within the scope of authority as the chief executive officer to carry out the laws of my State," he said. "I know of no higher authority in any State in this country in presenting indictments than the grand jury. These gentlemen were indicted by the grand jury in Waco, about 100 miles from the capital. A more intelligent, honset and upright body of men could not be found in this country. Its recommendation was indorsed by the District Attorney of the county. Mr. Reckfeller and the other gentleman named in the indictment were reported to me as fugitives from justice. I knew them by reputation, but I do not care who they are. They violated our laws and I sent out requests for their requisition in strict accordance with my duty. Their Indictments still hang over them.

The robbery was committed about noon while Postmaster Ridgley was at dinner and the standard until 5 o'clock. Access was not discovered until 5 o'clock. Access was gained to the vault by the use of duplicate keys. The vault is located in the postmaster's private office and the combination is never turned. In order combination is never turned. In order to secure entrance to the vault two keys had to be used, one to open the spring lock on the door of the office and the other to the inner door of the vault. Both of these doors were locked when Mr. Ridgiey returned after lunch.

Besides the stamps Ridgiey had stored in the vault his daughter's wedding presents, valued at \$1000. The stamps and silverware would make an enormous package and it is hard to conceive of a method to take them from the building in broad daylight without observation. It was 5 o'clock when Assistant Murphy had occasion to go to the vault for stamps. He found the interior of the vault in wild disorder and everything of value removed. There is no clew.

## A TELEPHONE DEAL

A Syndicate to Compète With Bell.

The Sugar Trust and Standard Company Said to in the Combination.

Gen. Clarkson Named as the One Who Will Engineer the Scheme—The Bell Patents with Other Improvements.

By Telegraph to The Times.

CHICAGO, April 3.—(Special Dispatch.)

What the Bell Telephone Company has
been fearing eince its patents expired has now assumed a definite shape, according to reports that bear the stamp of accuracy. This is mothing more or less than that a eern has been launched, or

is in process of construction, the mission of which will be to fight the Bell people out of the field; not in patches here and there, but in the entire territory where they operate.

According, to the report a telephone company has been formed in New York with a war-chest of a tremendous extent and backed by men, at the mention of whose names visions of vast wealth arise. The capital stock of the company is given as \$160,000,000. The backers big enough in the central world to have their names associated with so many figures are: The Parrott Company of New York; the Standard Oil Company, John E. Searles of the Sugar Trust, George Crocker, the San Francisco millionaire, the Pilisbury Minnesota flour men and James S. Clarkson. The movements of the men represented have been paragraphed in the newspapers have been paragraphed in the newspapers with the past few weeks in various parts of the country. Sometimes they have

been suggestively close to each other. About a week ago whispers of a big. rival for the Bell Company, heard in San Francisco, were echoed in Wall street, and now they swell into pretty authentic assurance that such a stupendous enterprise has been planned and inaugurated as will stir up the commercial world to an extent seldom experienced. The con-nection of Gen. Clarkson's name with the undertaking develops the fact that he quietly drifted into Chicago several days ago and has since been busily engaged with cipher messages and consultations with men who talk about millions as a small boy does about marbles. The most strenuous efforts have been made to keep the details of the enterprise secret, and, with that probable end in view, stories have been circulated to the effect that Gan. Clarkson's mission here was connected with a matter wholly foreign to telephones and

elephone companies.

The patents to be used is one of the The patents to be used is one of the secrets of the scheme and it is jealously guarded. From an inspired source it has been hinted, however, that the phase of the fight that will be particularly galling to the Bell concern is that the Bell patents, with improvements of recent inventors, are the very ones to be utilized by the new company. NEW JERSEY'S MYSTERY.

Raticulars of the Murder of the Unknown Colored Woman.

Associated Press Leased-wire Service.

NEY YORK, April 3.—The mutilated corpse found on Sunday morning at Sixth avenue and Waverly Place has been positively identified as the remains of Mary Martin, who lived with William Ceasar, a negro. Several arrests have been made. Orders have been given for Ceasar's arrest. Thomas Martin, husband of the murdered woman, left her two years ago.

Superintendent Byrnes tonight told the story of the circumstances which led up to the work and the work attending the arrest of the supposed murderer, the negro William Caesar. The story of the crime is most remarkable. Tuesday afternbon detectives found a woman who positively identified the dead woman as Mary Martin, the mistress of William Caesar. It was ascertained that on Friday night the couple had a violent quarrel, and that the woman threw a glass at the man, hitting him on the head. He then threw her down on the floor, after having grasped her by the throat with both hands. There, lying on the floor, it is said, he held her throat in such a grasp that he thought he had killed her, but when he released his hold he discovered that she was still breathing.

Then, according to the police, he secured a piece of cheese-cloth which was found tied around her neck on Sunday morning. This he put around her throat and twisted it and then tied into a double knot and strangled her. The next morning he went to work as usual, locking the door behind him. On Saturday evening Caesar prepared to dispose of the body. He borrowed a butcher's cleaver and first attempted to cut the legs off at the hips, but failing, out them off above the knees. He then took a piece of an aid rug, wrapped them up in it after having tied in his arms he boarded a horse car bound down town.

A rancher named Ed Lavin reported here today that he had been stood up at 8 o'clock isst Tuesday evening, on the road near Hillsdale. The robber at the point of a pistol compelled him to halt, climb to the ground and deliver over a gold watch and \$10 in money, all the valuables that he had on his person. until next November, there were many who wondered at his action. This was partly explained, however, at today's meeting of the directors of the association. They decided to wind up the affairs of the organization, and after May 1 the offices on Pine street will be closed.

The corporate existence of the Traffic Association will be kept up, but no attempt to do business will be made, as it is considered that a healthy competition in freight rates is now assured. It is hinted that Leeds will be given an important position in the traffic department of the San Josquin Valley Railroad, with which enterprise many prominent members of the Traffic Association are closely identified.

The Mayor was greatly surprised at this, expressing his gratification by remarking: "So you're going to be good boys now? Well, perhaps, I won't prosecute you for yesterday's work." Later in the day the track, which had been laid was removed. The company will now seek a legal fran-chise from the supervisors.

wilson, in company with Plout's assailant of last Saturday, J. D. L. McGaughey, was arrested on a warrant charging extortion. He gained temporary liberty through the connivance of a friend, but for several days he has been a guest at the City Prison. The charge against McGaughey and Wilson was called today, although it was known that Plout could not appear, owing to the wounds inflicted by McGaughey. Wilson was anxious to unburdon his mind, however, and was allowed to take the stand.

"I have known McGaughey since last August," he said, "and I got acquainted with "Dr. Plout's office several times and talked over his business with McGaughey, while he was employed there. One day I met McGaughey on the street and he said he had some torn letters which were written to Plouf by married women. He thought that their husbands would kill them if they knew of the matter, while they would also run Plout' out of town. McGaughey told me he had secured the scraps from Plouf's waste basie." We evolved a scheme and soon I went to Woddland with nine of the plaged episties. "I made the trip at the request of Charles A. Johnson, who was a co-laborer of McGaughey. Johnson gave me \$15 for expenses and I made my first call on a Mr. Curtis in Woddland. I told Curtis I had something he wanted. Then I showed him a few of the letters which his wife had sent to 'Dr.' Plouf. He offered me \$40 to hush the affair, but I deelined to deal with him until he raised his offer to \$60. I gave him nearly all the letters and returned to San Francisco, but I did not give McGaughey or Johnson any of the money. I told them that Curtis had foreibly taken the letters from me. The whole thing was intended to injure Plouf."

Wilson said Plouf had promised him immunity from prosecution if he would testify against McGaughey. Two Men Killed.

PRESCOTT (Ariz.,) April 3.—Frank Clark and a man mamed McGuire are dead, as a result of yesterday's explosion of glant powder in the Ohio mine, and James Newland, foreman of the mine, is seriously injured. Clark and McGuire arrived here from Boulder, Colo., a few days ago, and had only worked three shifts in the mine. The explosion was caused by a miner knocking a lighted candle into a box of powder, causing it to ignite, and the burning powder communicated with five boxes of caps, which exploded, causing three other boxes of powder to explode.

The men killed were working in a side drift, and when the slarm was given started for the mouth of the tunnel, and, just as they reached a point opposite the burning powder in the main tunnel, the explosion occurred, killing them instantly. Foreman Newland was a few feet behind them and had not reached the main tunnel, and owes his life to this circumstance. fight the escort, numbering 500 soldiers, surrendered to Masso. The fight took place at Holquin, near Santiago. The convoy consisted of sixty-nine teams, chiefly laden with provisions.

The Cubans here are elated over the news. It is certain a large army of Cubans and negroes are to be organized in Florida within a few weeks. This army will be dispatched from either an Atlantic or Gulf port of Florida. It is expected that quite a number of Cubans from Tampa and Key West will join this expedition. The opinion of well-informed Cubans is that they must get their men and multitons into the island before Gen. Martinez Campo, ordered from Syain, reaches the island. The Cubans fear Gen. Edward Brush, an Authority, Gives Reasons Therefor.

Associated Press Leased-wire Service

NEW YORK, April 3.—Edward Brush, secretary of the Consolidated Kansas City

Smelting and Refining Company, who is recognized authority on all matters pertaining to silver, talked last night to a reporter

in part:
"Without doubt it is expected that with is now being whispered by those failing to see the real cause for this advance that see the real cause for this advance that the indemnity demanded by Japan will be in gold and not in sliver, and for this

reason the speculative movement will fail.

My opinion is that there are legitimate trade reasons for a considerable advance, but, doubtless on account of this erroneous opinion that speculation has been based upon the expected indemnity should it prove to be gold, it may have a temporary effect to check the advance.

"It was my privilege to learn, about two months ago from one of the financial advisers of the Japanese government, their intentions in connection with this indemnity, that it would be demanded and paid in gold. Notwithstanding what has been said to the contrary, the Japanese government does not desire to place its currency upon a gold basis; neither does it believe it would be possible for China to arrange with European bankers to deplete the gold treas-

a gold bass; neither does it believe it would be possible for China to arrange with European bankers to deplete the gold treasuries of Europe to the extent of the indemnity which it will demand. It does expect, however, that this gold indemnity will be placed to the credit of Japan in the trade centers of Europe and will be used as a banking capital there to make such purchases of silver, war supplies and general equipments as its necessities require. The Japanese government has made during the war internal loans for 25,000,000 yen in silver. As its banking credit will bring them in only about 1 per cent. interest in Europe, and as its silver debt is cooling 6 to 8 per cent. In Japan, it will certainly be to the interest of the Japanese government to buy, as fast as it can be done, judiciously, silver with its gold credit, to repay its international loan.

"In the expression of English critics of the belief that Japan will get on a gold basis, the wish is father to the thought. The endeavor of the English government to piace India upon a gold basis has so far been a most dismal failure, resulting in placing the exchange of India 15 to 20 per cent. showe exchange of China and Japan. This has resulted in largely decreased exportations from Japan. Should Japan place her finances upon a gold basis, she would immediately-lose this advantage and place it in the hands of her principal rival, which must continue upon a silver basis. The Japanese are apparently shrewdenough to see this situation and to govern themselves thereby."

The defense will make the novel contention that even though the name of the payee was forged upon the checks, it is no offense against the government, as under the United States Revised Statutes every check signed in the name of a United States pension agent must be signed by the authority of the Secretary of the Interior, and that the Secretary of the Interior has never authorized any such signatures.

FINANCIAL AND COMMERCIAL

OFFICE OF THE TIMES,
LOS ANGELES, April 2, 1895.

If the report is true which comes from Japan to the effect that the large indemnity to be paid by China will have to be paid in gold, and that high Japanese officials have made a compact with bankers to the effect that the Japanese shall insist upon gold payment, it goes to confirm the belief which is very generally entertained that the banking classes of all nations, with some few exceptions, are and have for some years been engaged in a deliberate attempt to depreciate the value of gold, in which metal their honds and other securities are made payable. In other words, they can practically double the amount of interest

which they receive. It would certainly not be the natural thing for Japan to insist upon the payment of this immense sum in gold, as this is a metal which is very little used in the Orient, silver being the common medium of exchange. If Japan should put its financial system on a gold basis it would tend to create something like a panic in the financial world, as there is even now a shortage of gold for the use of those countries which adopted it as a currency.

There must, however, be a limit to this sort of thing. Even a child can see, if he is not wilfully blind, that there is not enough gold in the world without the use of some other currencies, such as sliver and paper. It is of the greatest importance to this country that some one should assume charge of its financial affairs who can look at this much vexed cuestion in a caim and statesmanlike manner, paying no attention either to the gold-bugs of Wall street on the one hand, or the sky-scraping silver dealers and producers of the West on the other. Until this financial problem is definitely settled there will continue to be a feeling of distrust in the money market.

The orange market continues in a con-dition which is not at all satisfactory to the growers. The exchanges report that it is still difficult to get orders in the East owing to the severe competition of foreign fruit which continues to pour into the market. Notwithstanding the received from the Mediterranean, it is stated that there is quite as much fruit yet to come forward. Up to date about haif the crop of Southern California has been shipped. The New York Journal of Commerce of March 22 publishes a table showing the amount of foreign oranges and lemons afloat for American ports on that date. The total amounted to 161,950 boxes, or 540 cars of oranges and 168,000 boxes of lemons.

The exchange officials still express the belief that the market will improve shortly and that it will not be necessary to reduce prices.

GENERAL BUSINESS TOPICS. There is prospect that the smelter which has stood for a couple of years partly fin-There is prospect that the smelter which has stood for a couple of years partly finished in the southern part of the city, near the river, may be completed and operated before long. It was recently announced that the plant had been purchased by an Arizona corporation known as the Pacific Mining and Smelting Company, having a capital stock of \$250,000. The parties interested are said to be residents of New York who have plenty of money.

It is certainly to be hoped that this report is true. For many years Los Angeles has been crying out for a smelter, and one would have been in operation now had it not been for the financial panic of 1893. There are plenty of valuable cres within a reasonable distance of this city to keepsuch a smelter busy, and there will be enough for several smelters as soon as a road is built to Southern Nevada and Utah. At present a good many valuable mineral deposits are tying idle because it does not pay to ship ore to Pueblo, Kansas City or San Francisco, which are at present the nearest points where they can be worked. The completion of this smelter, will undoubtedly mark the commencement of a mining era in this section. The mines will be a most valuable adjunct to the horticultural industry, as a mining camp is a great consumer of agricultural products, producing nothing itself but mineral, and thus not coming into competition with the farmers, but furnishing them a valuable market for their products.

Articles of incorporation were filed with the County Clerk yesterday by the Western Empire Publishing Company of this city. It is formed for the purpose of carrying on a general publishing, printing and illustrating business, including the publishing of newspapers, magazines, periodicals, etc. Capital stock \$20,000; actually subscribed \$2100. Board of directors: M. B. Miller, C. G. Miller, W. J. Kelly, C. M. Simpson and W. J. Lawless.

The Weather Crop Bulletin of Southern California, for the week ending Monday, April 1, reports that the warm dry weather at the close of the week previous to this report was followed during the first portion of the week just closed by rains, which were general, and in some sections the heaviest, in regard to precipitation, of the season. Fair weather following the rains gives assurances of good crops should no sudden hot spells set in to mar the the prospects which are now auspicious for large and abundant yields of all crops. The rains will cause a larger area to be planted to corn and root crops and will shorten the season for irrigating orchards; the honey crop is expected to be large on Jaccount of the rains stimulating the growth of wild flowers. Apricots are reported to be dropping with indications of a light crop, probably caused by the late heavy rains; other deciduous fruits are setting well. Orange trees are in full blossom.

San Luis Obispo.—The weather during March was generally warm for the season with the average amount of sunshine. The rains were well distributed through the month, promoting the steady growth of grass and all crops. Fruit received a slight check by, the frosts of the middle of the month. All early crops are well advanced and late ones are making good headway.

Ventura county—Bardsdale: one and a half inches of rain fell March 28, making eighteen inches for the season. This last rain was all that was needed to put farming operations in first-rate cdridition, and the outlook is flattering. The yield of hay and small grain will be heavy, and setting war of the

Los Angeles county—Los Angeles city—heavy.

Heavy rains fell the first part of the week followed by fair but slightly cooler weather; the highest temperature was 75 dex. lowest 41 deg.: rainfall 2.46 inches. Yerdugo: The rainfall since the last report is 2.98 inches, which insures good crops of grain and will increase the acreage of corn and root crops. Apricots are falling badly, but peaches promise to set well. Orange trees are blossoming.

Pasadena: The warm weather of last week ending in the heaviest rain of the season as regards precipitation, 3 inches falling in thirty-six hours. It was very welcome, and, barring any sudden hot waves, the crops are practically assured. Fruit trees are in leaf and have set well; seasonal rainfall to date 22.48 inches. Duarte: The past week was favorable for the growth of all crops; barley, however, is somewhat backward and has grown very slowly this winter. Apricots are light; peaches are well set and prunes in full bloom. Highest temperature \$6 dex. lowest 43 deg.; rainfall 2.88 inches. La Canyada: The fruit crop will be large, and the hay crop unusually fine.

The rain was opportune for newly-set fruit trees and was beneficial to older orchards, and crops in general. Rainfall for week, 4.24 inches, for season 24.93 inches. Highest temperature 75 deg., low-set 37 deg.

Riverside county—Perris: Eight-tenths of an inch of rain fell March 27 and 28, which was much needed and crops are now growing rapidly. Light frosts occurred at the close of the month without damage. Highest temperature 82 deg., lowest, 30 deg.

Orange county.—Tustin: Four inches of rain fell and assures large yields of grain and pasturage and will shorten the irrigating season. Apricots will be light; nrunes are in full bloom. Bee men expect large honey yield. Anahelm: The past week's storm resulted in precipitating 2.29 inches of rain, which now insures full hay and barley crops, also materially aiding the beet fields and the newly-planted orchards.

San Diego county—Valley Center: Vegetation is booming; the sun—is smiling, the spring is balmy; bees are buzzing; milk is flowing and grain is growing; 86 deg., highest temperature; rainfall 1.15 inches. Bernardo: Barley is beginning to head out in places; the straw will be shorter than usual.

The heavy export clearings of wheat and flour from New York and Raltimore vesteries, impartad, considerable haltimore vesteries, impartad, considerable visions at declines. The heavy export clearings of wheat and flour from New York and Baltimore yesterday imparted considerable firmness to wheat, which opened in good demand at the rate which was named as the nominal value on the curb on the day before. The market became quite strong. May started with plenty of buyers at 54% and sellers at 55, and a compromise was made at 54% 255. The buying started a general upward movement, which frightened those of the scalpers who had been inclined to work the short side. The price rose to 55% by 11 o-lock under the good demand and limited offerings. Paris was reported as closing 10 centimes lower for April flour and 10 centimes lower for the September and December term of wheat. The closing cables and some disappointment at the result of Bradstreet's visible-supply statement created a weaker, feeling to succeed the earlier builtishness, and the price dropped back again to around 55 for May. The world's stocks decreased 2,332,000 bushels last week, which was a disappointment, thasmuch as a falling-out of the third of the more imaginative of the built crowd. The Illinois State crop report was very bearish. It remarked that damage to wheat by any cause was so slight that no consideration had been taken of it and that the crop promises a large yield at harvest. At the close the price was 54% for May. The corn market was firm, owing to the small receipts and a better demand for the light offerings. #### THE FUTURE OF THE ENGLISH SPEAKING BACE.

As a nation the American people are somewhat boastful, and are inclined to the belief that they are a little in advance of all the other nations of the earth. There is such a breezy vast ness to the continent which we inhabit, and so many climatic differences are found in that portion of it which is under the sway of the old flag, that we look upon our wide domain and the advance of civilization within its borders, and stand ready to challenge other nations to show progress that is equal to that which we

have made within the past century. The great Columbian Exposition did somewhat in lessening our inflated ideas in the direction of American gulture and general industrial and artistic advancement, and we became conscious to a new degree that, while the American people during the past century had shown a developm that was marvelous, other nations had likewise moved onward along the same lines, with the advantage on their side, which we do not so fully possess, of centuries of civilization behind them.

Let us, for instance, cast a glance at Great Britain, after looking so proudly at the march of empire in our country and following the new paths that we have made for freedom across the mighty expanse of a continent, and note her growth and the extension of her domain within the past one hundred years,

Consulting the proper authorities we shall find that the existing colonies and dependencies of Great Britain comprise nearly one-sixth of the land surface of the globe, and about the same proportion of the world's population. Looking at that great island continent. Australia. with its populous towns and cities and vast wealth of industries, we discover the fact, difficult of realization, that a little over a hundred years ago there was not a white man in Australia or New Zealand. At that time also, Great Britain did not own a rod of territory in South Africa, while in the whole of Canada there were hardly more than 200,000 inhabitants of European extraction, and half of these

were French. It is just a hundred years since Ceylon became a British colony, and not till twenty or thirty years later were the Straits settlements acquired Hong-Kong has been a British pos session but fifty years, the Mauritius since 1810, and the annexation of Burmah was not completed until about ten years ago. Malta was se-

fifteen years since. At the beginning of the century the British possessions in this country were in their infancy and their aggregate population was not equal to that of many of our cities. But look at that Old World empire today! How vast its dominion, and how mighty its population and its wealth! Canada's population is now equal to that of Scotland and Wales combined, and her mercantile marine is one of the most important of the world. From east to west the great Canadian Pacific traverses the gigan tic distance of 3000 miles. Within the Dominion are great and thriving cities, populous towns, vast wealth of varied industries, and almost limitles ources that have been developed Australia, rich in her gold mines and unexampled resources, has her large cities and populous colonial capitals New Zealand, which less than fifty years ago had only about two thou sand English residents, has now many beautiful cities containing from twenty-five to thirty thousand people with all the municipal improvement of modern civilization, with many smaller towns having a population of from two thousand to seven thousa each, and numerous others ranging from one thousand to two thousand in population. In this island world the people are abreast with modern civil ization everywhere and their march is steadily onward.

In Africa the grasp of British rul is strong, and Cape Colony and the colony of Natal are in its possession as well as Zululand, and Bechuana-land, and Mashomaland and Matabeland. Other points are also under he dominion, and the growth of the mother country is keeping pace with our own. The English tongue is be ing spoken in every land under the

What a future there is before the English-speaking race! Our tongue is the tongue of freedom, and throng it shall come the highest human adancement. Wheresoever it is spoken Christian civilization shall be borne and the gradual uplifting of the race plished. Industry, art and political freedom shall be enlarged. and Christian America and Christian England shall join hands in the work for the universal amelloration of the race. It is a grand thing to contemplate, an outlook to gladden the heart of the philanthropist and every lover of human advancement. What Rome was to the Old World as a civilizing and conquering force, America and England shall be to the New. But they will gain their victories not by clash of arms and bloody conquests but by the might and power of enlightened sentiment that shall bear with it pobler ideals than ever Rome knew, and a spirit that shall complete the intellectual and moral conquests of the race.

#### A WORTHY INSTITUTION.

Los Angeles is particularly noted

San Francisco is already putting on an awful sight of "side," and all because it has started the San Joaquin Valley Railroad ball rolling. Come to think, that ball wouldn't have got started yet if Los Angeles had not showed those "back-numbers" up there how to do it. Now that they have learned the trick San Francis cans are beginning to "feel their oats," for already they have another railroad under way, on paper, to run from San Francisco via Santa Cruz to Tulare along the west side of the San Joaquin Valley. Those San Francisco fellows have got heaps of nerve and it's only now they are finding it

The cotton industry of the South is menaced by a new process of manufacturing a substitute for cotton from wood-pulp. The substitute is said to nearly or quite equal to cotton, and it is claimed that it can be manufactured at a much less cost than the price of cotton. The process is a elgian invention, and, according to a late report from United States Consul-General Morris, a plant established at Ghent has been highly successful, cured eighty years ago, and Cyprus turning out a product which is sure

to become a strong competitor with cotton in the markets of the world. It may be that the South will yet be forced into diversified agriculture whether or no.

Doctor Sarah Hackett Stevenson of Chicago is out as an advocate of "dress reform" for men. She thinks the average man should be put into short skirts, reaching to the knee, and that women's skirts should be correspondingly shortened, so that there will be no invidious distinctions of sex. Bright idea. Let the triumphr wave of reform march steadily on-ward. Grover Cleveland, for instance, would look just too sweet for any-

Eminent physicians of New York operated upon two idiots, recently, operated upon two idiots, recently, with a view of restoring them to mental soundness. If these operations prove successful, the physicians should change their base of operations to the national capital. The first experiment should be tried on Gresham. If he can be restored, no idiot need despair.

Spaniards would rather fight than to apologize for the Allianca affair, they can be accommodated. This is all right as an abstract theory; but the present administration appears to be made up mostly of men who would rather crawl than to fight.

Chicago's new Republican Mayor-elect proved himself so Swift a runner that the Democrats lacked over 40,000 votes of overtaking him.

#### AT THE PLAYHOUSES.

ORPHEUM.—The bright and varied bill it this house this week deserves bigger houses than are the rule. There is a touch and go to the performance and there are houses than are the rule. There is a touch and go to the performance and there are ample opportunities to laugh and grow fat. Magee and Crimmins's boxing bout is a very funny skit, Adele Purvis Onri does a graceful and fetching turn, the French quadrille dancers and vocalists get frequent encores, Ford and Lewis do a lively bit of horse-play and Miss Redding and Hugh Stanton play the comedicita, "A Happy Pair," with bright touches that show both talent and dramatic training. The flock of cockatoos go through, their show both talent and dramatic training. The flock of cockatoos go through their marvellous feats, and Brown and Harrison close the bill with a bit of side-splitting comedy that keeps the house in a roar of laughter. The same programme will be continued through the week.

The Whitney Company comprises more than fifty people, headed by Dorothy Morton. This star comes to us backed by lavish pressnotices and the attraction is said to be one of the brightest and cleverest of the theatrical world. The engagement is for three nights and a matinee.

OMAHA (Neb.,) April 3.—The preliminary hearing of the eight men who have been arrested on the charge of having been amplicated in the burning of St. Paul's Polish Church, began this afternoon in the Police Court. All of the men succeeded in finding bondsmen. The hearing was not completed.

It is acknowledged that the night preceding the fire a boy went to one of the grocery stores and purchased a can of kerosene, saying it was for Priest Karminsky. The name of this boy has not yet been learned, but detectives are working on the clew. Friends of the accused men are confident that all will be discharged. They claim that there is not enough evidence to bind them over to the District Court. Friends of the accused say that they have had the detectives working on the case since the fire and that they have discovered sufficient evidence to warrant them in swearing out complaints against members of the Bishop Scannell party.

Miss Antolnette, eldest daughter of E. Rotan of Waco, Tex., and one of Texas' wealthlest and most popular bankers, will be united in wedlock to Dr. Fredrick Peterson, a prominent mental aspeciating of New York. IN THE FIELD OF ELECTRICITY. afforded at a recent hearing in Con at which a realroad committee AN ELECTRICAL TYPE-SETTING MACHINE

Telephoning by Light—Steam and Electricity—Public Lighting in American Cities—Climates Made to Order.

NEW YORK, March 26.—(Special Correspondence.) Prof. F. B. Crocker thinks the time is not far off when, by artificial means, we shall be able to effect a considerable modification of the climate of our cities. It has already been suggested to utilize the heat of the tropics for tempering the harwhness of colder climates, by transforming the sun's rays into electricity. In the tropics to the solar energy develops a force of about one horse-power to each ing the harshess of colder climates, by transforming the sun's rays into electricity. In the tropics the solar energy develops a force of about one horse-power to each square yard of the sunface exposed, and as there the sun's action is almost continuous, the force would be fairly reliable. But Prof. Crocker's idea is much simpler than this: He proposes to pipe the air from a distance, as we now pipe water, oil, natural gas, coal dust, milk, and even wine. A thin steel tube of five feet in diameter world earry an enormous quantity; much more than any one would realize who had not figured it out. Such a pipe line as this would not be very expensive, and would present much less material difficulty of equipment than a railroad. A pipe three thousand miles long would stretch from the tropical to the Arctic zone. In spite of the apparent withness of this suggestion, Prof. Crocker regards it as not half so daring as was the idea of laying a cable under the Atlantic. The difficulties to be overcome then were greater than any obstacles which this enterprise would meet. Science has brushed aside so many hindrances and probed so many secrets that it is now very hard to define its limitations. The time may come when we shall be just as anxious and just as active in providing, means for a fresh air supply for our cities as we now are to have pure water available. In all probability, the idea will first be tried on a small scale, such as piping the air from the nearest seaside resort; but the extension of the system to long distances is perfectly feasible. Prof. Crocker's reputed idea is that this control of climates would have to give done by national, rather than State or municipal action, and would probably require co-operation between this government and the Canadian and Mexican governments. Such a pipe line as has been suggested would have to extend from some of the very code of from the north and warm air from the south. This would also give a means of controlling the rainfall. A cold blast would be turned on when rai controlling the rainfall. A cold blast would be turned on when rain was needed and a hot blast when it was desired to keep it away. This idea may possibly be worked out in course of time, but in the meantims, some electric central stations are proposing to supplement their regular ousiness by supplying to their customers cool air in summer and warm air in winter, and, in all probability, this less ambitious scheme will be the first to be put into working shape.

TELEPHONING BY LIGHT

TELEPHONING BY LIGHT.

Prof. Alexander Graham Bell believes that telephoning by means of a beam of light will yet be commercially practicable. This belief has grown out of a long course of experiments with selenium. Selenium is marvelously sensitive to the influence of light, when it is exposed, to which it gives vibrations which can be electrically transmitted. This remarkable power of transmission induced Prof. Bell to test other materials with a view to discovering the same phenomenon. He placed various substances in a test tube, and after making a connection with a hearing tube, subjected the substances to the influence of intermittent light. Sounds of varying intensity were heard through the tube, according to the intensity of the light and color. Objects that were diffuse, as woolen, cotton, worsted, etc., gave out the loudest noises. One day, as an experiment, he blackened some red TELEPHONING BY LIGHT. and leader camped for room a beard of managers to 300 members.

AN ELECTRICAL TYPESETTING MAOHINE.

An electrical typesetting machine has been invented by Father Calendoli, a Dominican friar, on which, it is said a speed can be obtained four or five times as great as that possible with the typesetting machines now generally used. The keyboard differs radically from that of other inventors in that the keys corresponding to all the letters in a word of reasonable length may be simultaneously depressed and the type will be set in proper order. The keyboard holds fifteen alphabets of lower case, at the left hand, three of upper case, at the right hand, and a line of punctuation marks, etc., along the top. There are thirty keys; the vowels a, e, i, o, on each are triplicated, and the vowel u is duplicated, while each consonant has a key to itself. It is possible, of course, to arrange the letters in any way, but on Father Calendoli's machine they are placed in the order of their frequency in the French language. Thus, the i is placed first as the first left-hand key on the upper row; second, as the third in the center row, and third, as the next to the last in the lowermost line. In composing a word the operator selects the letters most convenient to the position in which his fingers happen to be at the moment. Thus in setting the word roi, the i would fall to the hird finger of the letters most convenient to the position in which his singers happen to be at the moment. Thus in setting the word roi, the i would fall to the hird finger of the letters most convenient to the position in which his singers happen to be at the moment. Thus in setting the word roi, the i would fall to the hird finger of the letters most convenient to the position in which his said to be so scientific and judicious that a little practice gives the ability to select the proper letters almost instinctively. The back of the keyboard is occupied by vertical tubes, resembling the pipes of an organ, and here the type is stroned. At the bottom of each tube is a releasing bott actual by an electro-magnet,

for one year for illuminating purposes in the cities of the United States is put at for one year for illuminating purposes in the cities of the United States is put at \$10,000,000. This covers only the lighting furnished under efficial authority, and at the public expense, and is exclusive of the amount paid by individuals, corporations, hotels, theaters and railroad and steamship companies. Of the \$250,000 appropriated annually for the lighting of the city of New York, \$105,000 is divided among four gas companies, and \$98,000 goes to the seven electric-light companies with which the city has contracts. The gas supplied to public departments costs \$10,000 additional, and about \$1000 is spent on naphtha lamps. Chicago, which owns its own electric-light plant, spends \$140,000 a year on gas. Philadelphia, which also owns its own lighting plant, spends \$500,000 a year on lighting. San Francisco spends \$200,000 and Boston about the same, \$1. Louis, which has in so many electrical applications gone far ahead of other American cities, spends more in a year for electric-light illumination than for gas, and it is the only large city in the United States of which this is true.

FLASHES FROM THE WIRES.

A general court-martial is in progress at Fort Porter to try Capt. John B. Guthrie, Co. A. Thirteenth Infantry, on the charge of having allowed Sergt. Marriott to partake of a Christmas dinner at the fort while under indictment for the murder of Edward Schuler, a fellow-soldier. Col. Cyrus S. Robert is judge-advocate and Col. Smith of Fort Smith presided.

Senor Romero, the Maxican Minister at Washington, is in receipt of a report from the Governor of State of Mexico, dated of the 22d uit, stating that the authorities of the 22d uit, stating that the authorities of the city of Cordova, near which town R. G. Morrison, an American citizen, formerly of Detroit, Mich., was reported to have been murdered by bandits, are without the slightest foundation. The published statements that Morrison had been robbed and murdered are declared to be baseless.

The President has suspended his action on the proceedings and sentence of dismissal of the navial court-martial in the case of the fact that the officer, by power of attorney, dated March 22, had placed the entire management of his financial affairs in the hands of his brother, Gen. Joseph Smith of Bangor, Me., giving him full authority to undertake the discharge of his financial obligations. The President retains power to give the sentence at any time hereafter should the officer fail to fulfill his promises.

There are no better eigns of a place's prosperity than schoolhouses. Riverside is adding to its indications of progress by ilding another one.

Folis in Ontario are laughing at one of the City Trustees who had his cow impounded the other day because the animal wasn't kept in proper bounds.

This is the season of the orange blos-som, and from all over Southern Califor-nia there ascends to Flora and to Pomona incesse as sweet as ever greeted the senses of the goddess.

San Bernardino's public library is growtag like a young bay tree planted by the riverside. It has just been made the recipient of one hundred volumes of war records presented to it by the Federal authorities at Washington.

Before paying bills presented by con-tractors for street work, property-owners will do well to verify them at the Street-Superintendent's office. It is reported that bills of this kind have been presented in which considerable overcharges have been made.

Some merchants are already beginning to decorate their stores with the flesta colors. This is rather early, and if we should have a rain during the next few days, as is not improbable, the bunting will look rather shabby by the time the

There is one thing in the line of improvement that Riverside can do and not want for bonds to be issued, and that is provide better protection from fire, and the City Trustees are going shout it. Another new industry is being developed down in Orange county—that of growing artichokes in the peat lands, west of Santa Ana. It is claimed that the peat soil is specially adapted to the cultivation of this product, and that the results from experiments made last season were far better than was expected. What will Orange county develop next?

A goodly delegation of San Diegans proposes to attend La Fiesta de Los An-celes. The burning of the Hotel Terracina at Redlands is a serious loss to that thriving town, but it is not thich; that the lot on which it stood will be allowed to remain vacant very long. The Times reports state that the insurance on the building and furniture was \$12,000, but as the flames spread so rapidly that nothing could be saved, the loss over and above the insurance will amount to not less than \$30,000. CORE DETAILS OF THE ROBBERY ON MISSION BOAD.

The Highwaymen Did not Get All Their Victim's Money—They Tied Him Up and Rolled Him Down a Bank.

The highway robbery which occurred on the Mission road Tuesday evening proves to have been a more serious affair than first reported. The wite and son of Fred Ryan, the victim of the robbery, appeared at the police station yesterday and told the harrowing story of the crime. They also identified the horse and cart brought to the station at 2 o'clock Wednesday morning, as reported in The Times, as the rig stolen by the highwaymen.

Mrs. Ryan's story was to the effect that she noticed two men lying in the mustard

she noticed two men lying in the mustard stalks by the wayside near the Ryan residence on the Mission road, Tuesday afternoon. Mr. Ryan is a street car driver in the city, but lives on a ten-acre ranch a few miles out of town. His thirteen-pear-old son usually drives to town in the evening to take him home in a cart.

The boy went after his father as usual Tuesday evining, and as they neared the house on the homeward journey, two men rose up out of the weeds at the side of the road, and, leveling a revolver at them, told them to stop. They halted and Ryan was then ordered to get out of the cart. The boy was ordered to drive the cart rapidly around a hill out of sight of the house, and because he did not drive fast enough one of the robbers hit him on the head with a revolver.

Ryan was then marched around the hill also, and searched for money. The highwaymen ordered him to open all his clothes. While doing so he managed to take \$22 out of his trousers. In that way he saved the \$22, but the thieves took his watch and \$4.50 which he had in another pocket. They then beat him over the head with a revolver because he did not have more money, inflicting several bad easip wounds which bied profusely.

To conclude their nefarious work, the highwaymen tied the man and boy hand and foot with twine, and then bound them together back to back, after which they rolled them down an embankment. The robbers then jumped in the cart and drove off at a rapid pace.

The man and boy, badly frightened and suffering from the beating inflicted on them, were afraid to cry out, as the robbers then jumped in the cart and drove off at a rapid pace.

The man and boy hardy frightened and suffering from the beating inflicted on them, were afraid to cry out, as the robbers then jumped them how an embankment. The robbers then jumped them how an end to do so, or they would return and kill them. Finshly the boy managed to get hold of the end of the cord around his wrists and as it was tied in a slip knot he soon had his hands free. He then succee

## IN SOCIAL SPHERES.

Mrs. O. H. Churchill of Figueroa street gave a charming luncheon yesterday, at which covers were taid for sixteen. The decorations in the dining-room were very artistic, trails of wistaria wreathing the mantel, chandelier and sideboard, tied here and there with broad violet satin ribbons. Upon the table wistaria was prettily arranged, contrasting with duchess roses filling the cut-glass vases. The favors were decorated with sweet peas, done in water colors, and tied with violet satin ribbon. In the drawing-rooms, great bowls of pansies filled the air with fragrance and made the room like a bower. An India basket overflowing with callas filled the fireplace.

The In tal ment Place

Scares some people from buying that way, as they seem to think that interest, taxes, insurance, repairs, water rent, etc., etc., will amount to so much that they will never get through baying. Now you are misinformed and we can show you why. Our specialty is that class of trades on an equitable basis in which the interest is reckoned on each partial payment at 8 per cent and, as the payments are from \$15\$ to \$25\$ per month, it is just like paying rent, and before you know it the place is yours and you have a stake instead of the remains of "dead horse." Let us show you a duck of a place, new, colonial, six rooms, \$1800, at \$25\$ per month, no cash down. Langworthy Co., No. 225 South Spring street.

# Yale's La Freckla.

Death to Freckles.

Mme. M. Yale was recently asked the question "which of her discoveries she considered the most wonderful." Her reply was as follows: La Freckla, because it unmasked my own face from a filthy mass of freckles and gave me the beautiful rose leaf complexion which you see and which has been admired by the people of every nation. Before I dis-covered La Freckla I was a freckled face individual, disgusted with my own appearance. Today I am the envy of every woman who looks at my skin.

La Freekla will remove any case of freckles in existence and leave the skin as transparent as crystal. One or two applications removes tan and sunburn. It takes from three to nine days to destroy every trace of freckles. It is the only remedy known to the world that does this. Now is the time to use La Freckla, as it strengthens the skin, removes and prevents freckles and sunburn. \$1.00 per bottle.

There is a turn in the tide; the store grows; the trade enlarges; enthusiasm holds sway all along the line; the Fiesta colors loom up on every side; it is talked about, read about and dreamed of by the people; people are beginning to prepare for Fiesta week; colors are selling more freely; there is a greater call for badges. New Dresses, Cloaks and Capes are being called for; Millinery is trebling up on sales; Dress Goods are moving with greater emphasis; the store is busy in every nook and corner; look in upon the decorations; interview our silhouette artist; it takes one minute for your picture; it costs you nothing; a small purchase of 50c worth or more brings the result. All through the store there are crowds; there is buying millinery in all its glory for Fiesta and for Easter. A double purpose served this year with one expense; the prices never so low; the styles never so good; new flowers, new feathers, new ribbons, new shapes; what is still better, new prices that are lower than ever before. The Millinery room is now in attractive form for early buying; don't wait until the Easter rush is upon us; come now. More new Capes will be on sale this morning along with more new Separate Skirts and all-wool Suits, Silk Waists and Silk Skirts. #### Election of Grand Officers at Yesterday's Meeting.

The Visitors and Their Hosts En joyed a Great Drive in Tally-hos.

The People from the North Were Captivated with What They Saw-Secret Work Exemplified in Lodgerooms.

The big drive of the A.O.U.W. delegate yesterday morning was a grand success, in spite of the fog which banketed the earlier hours of the day. A long line of carriages and tally-hos, filled with delegates and ladies, started from the Maccabee Temple and made a merry procession through the most beautiful parts of the ity to various points of interest.

They first went out to Temple street and up to Bunker Hill; then came down Sec-ond street to Grand avenue, going out Grand avenue to Fourth street. The line Grand avenue to Fourth street. The line then wound along Hope street and took in the Normal School, thence to Seventh street by way of Pearl, and so out to Westlake Park, with much vigorous blowing of their own horn, or rather horns. Coming back, they took in Alvarado street to Washington, then came down to Tobarrana, street and along Adams and

street to Washington, then came down to Toberman street and along Adams and Figueros, then north to Pico and Hill streets, and so back to the temple, with the recollection of a thoroughly joily morning and an increased admiration for the many beauties of Los Angeles.

At 10 a.m. the second day's session of the Grand Lodge was called to order, and the business of the day was taken in hand. Several amendments relating to the assessment of members, and to some changes in the constitution, were adopted, and the following resolution was also adopted:

Yesterday afternoon a number of young ladies interested in a company of equistriennes for the floral parade met at flesta headquarters and decided to call the organization the Ladies Riding Club. Mrs. Jennie Hooper was elected president and Miss Nellie Duvall vice-president. It was agreed that the members of the club will meet again Friday afternoon at 3:30 o'clock. The young ladies are taking much interest in their club and will present a dainty appearance in the pageant.

Dr. Fleming, chairman of the Native California Committee, reports that the company of Spanish caballeros now numbers sixty members, which insures a magnificent display of fine horsemanship and picturesque costumes. The company, it was at first thought, would be about twenty-five, but it has outgrown the original scope just as so many features of the flesta have done. The costumes of the caballeros and the trappings of the horses will be rich and sumptuous, the horses being especially selected, and coming, as well as their owners from many parts of Southern California. The riders are all skilled in horsemanship and the committee is sparing no trouble to secure such a collection of members as has not been seen before in Los Angeles in the peculiar and graceful riding characteristic of the West.

## ODD FELLOWS.

The Fortieth anniversary of the insti-tution of Los Angeles Lodge No. 35, I. O. O. F., was celebrated last evening at the hall on Main street. Mr. Ashman, the hall on Main street. Mr. Ashman, P. G., commenced the programme with a few remarks regarding the plonger members of the I. O. O. F., and said that there was only one charter member of the lodge, No. 35, Alexander Crabb, known to be living. There are 2000 members in Los Angeles county and the last years of the lodge have been prosperous in every way. The speaker closed with a cordial welcome to all present, and then introduced Mr. Bonfillio, the master of ceremonies.

The following programme was then rendered, to the great enjoyment of the audience: A gavotte by the Septette Club; a wind programme was the club; a septential of the control of the club; a septential of the control of the audience: A gavotte by the Septette Club; a cornet solo, accompanied by the club; a violin solo by Krauss, accompanied by Angelotti; piano solo by Miss Bonneli; recitation by Miss Mattie Hare; violin solo Krauss; flute solo by Mrs. E. J. Roller; viano solo by Angelotti, and a bass solo by Frank Wallis. Almost every number was heartily encored. Past Grand Master W. H. Barnes of San Francisco, was then introduced, and made a very interesting and witty address. He said that the lodge was instituted forty, years ago, just five months before he joined the order. He received the rank of grand master in the State of Georgia. He spoke of the hostiallites he received in Los Angeles twelve years ago, when he was a delegate to the Press Association which met here, and made many flattering comments upon the city and the citizens. Mr. Barnes of the Rebekah Lodge, and said that the 260,000 women were all handsome, as the constitution says that only good looking women may become members. (Applause.) One hundred and seventy-five thousand widowed and darkened homes have been relieved, and children protected and educated.

No Odd Fellow is ever buried in a pauper grave, nor their widows or orphans allowed to go "over the hill to the poorhouse." On April 26, the speaker said, he would give an address at the seventy-sixth anniversary of the institution of the order in the United States. In 1856, when an Odd Fellow of a year's standing, he gave an address in Atlanta, and had given one every year since, and in every State except the Dakotas. He prophesied great things for the order in the future, and paid a spiemdid tribute of respect to the noble I.O.O.F. At the close of his address he sang a darkey song, to his own accompaniment, on the subject of the succulent "watermillion," and was so uproariously encored that he responded with a darky psalm tune, which greatly delighted everybody.

After another number by the Septette Club the audience adjourned to another hall where they enjoyed an excelent supper. Among those presnt were: C. W. Pomeroy, P.G. Garden City Lodge No. 121, San Francisco; Miss Fannie Benjamin, Grand Vice-President of Rebekah branch of the State of California, Messrs. Louis Roeder, Adolph Frank, W. A. Bonyage, S. C. The Rapid Transit Scheme Proposed by a San Francisco Capitalist.

The Rapid Transit Scheme Proposed by a San Francisco Capitalist.

A railroad on wire. Such is the scheme which D. R. P. Thomas, a San Francisco capitalist, now has on foot. He proposes to build what he calls an aerial road from San Francisco to Los Angeles up the celebrated San Joaquin Valley. The cars will be suspended on cables and operated by electricity. They will run at the rate of 100 miles an bour. No grading will be necessary for the construction of this road, no ties, and no rails, no bridges and no fencing in of track. No section gang will be required in its maintenance.

It will, so its projector thinks, be the first road in America to be absolutely free from smash-ups. The cars can't collide head on because the road is a double track, and they can't be telescoped because, by a simple little mechanism, is one train, comes too close to another the electricity is shut off. No obstructions or blockades can interfere with its running. The cars cannot jump the track. The wear and tear on its mechanism and rolling stock is comparatively light. It costs from one-third to two-thirds less to construct and maintain than any other line of raifroad. It simost solves the question of the right of way. The road may be quickly constructed and will be sightly when finished.

This new railroad is not the invention of the capitalist, but of his blind brother. "He planned it all out in his darkness," says Mr. Thomas, "and you will see, one of these days, that it is such a perfectly feasible and admirable plan that it will one at railway are, of course, its main advantages. As far as speed is concerned, it is now only a question of atmospheric resistance. And this matural factor can be largely overcome by constructing the cars either cone-shaped or with pointed ends like the prow of a boat. But that, of course, is an after-consideration, and no such device will be needed to stain a speed, say, of 100 miles an hour. And such a rate can be mistained easily and with entire comfort and safety to the passengers in their mid-a

Mr. Thomas declares, are as yet but little known.

"My plan," says Mr. Thomas, "would be to build compressed-air tanks glong the road in the country where trains could stop for a mement or two and recuperate the motive supply. I am satisfied that in the end compressed air would be cheaper and more satisfactory than electricity."

The road will be elevated from ten to twenty feet above the ground, according to the requirements of the grade and whether the road be passing through the country or the city. The cars will be considerably smaller and lighter than the present railway cars now in use. They will be tighted by electricity and heated in

this way also, and, for that matter, could easily have telegraphic communication all the time with the outside world.

The California idea does not vary in its essential particulars from two rapid-trainsit systems which were exhibited at the World's Fair. One of these, known as the Cook system, proposed to have care suspended from a single track, placed at the top of a series of poles. The idea was that the care were to be somewhat in the shape of a present railway car cut lengthwise in twain. One set would move in one direction on one side of the pole, and the other set on the other side in the cappeatte direction. This was an invention of L. D. Cook of Tacoma, who constructed a trial track on the outskirts of Tacoma, and claimed to have run his care successfully at the rate of 100 miles

#### POMONA.

Dastardly Act-Trustee Meeting-Fruit and Flower Mision.

POMONA, April 3.—(Special Correspondence.) A dastardly piece of work was executed either Tuesday afternoon or Tuesday night, by some unknown party or parties breaking into the store of O. Sweet & Co., at the corner of Second and Gordon streets, the one occupied by the late Charles O. Sweet, whose funeral was being held, and burglarizing it of about \$25 in cash and \$50 worth of merchandise,

making their entrance through a transom at the rear of the building.

After the fact was discovered this morning a report was immediately made to the local officers, who, on a thorough examination, concluded that it had been perpetrated by three hobos or tramp transients, that had been loitering around for three or four days past, and that had disappeared since last night. Upon these facts Constable and Deputy Sheriff Frank O. Slanker had the necessary warrants issued from Justice Barner's office, and left for San Bernardino. One suspect has already been committed here, and the remaining local officials have their eyes and ears both open to learn what may be seen or heard.

#### Debs, the Anarchist.

Debs, the Anarchist.

(Spokane Outburst:) Judging from the reception given to Debs in this city, one would think that the Anarchist of a year ago has become the hero of today. This erchusiast, as all well know, came near precipitating a civil war in this country, which was only averted by the rise of the patriotic spirit of America, which condehined his rash acts and his questionable methods. Under any other government than our own Debs would have paid a severe penalty for his conduct. But the American people are forgiving, and have partially condoned his offense by giving him the credit of sincerity in his purpose, however crazy in his intellect. It is going to far, on the other hand, for him to travel in the guise and to receive the honors of a hero. It is a bad precedent to reward a man with his record with the homage of the people; and it is astonishing to see the pandering press and truckling politicians of this city vie with each other in heaping honor upon this man's head. Debs ought to be asking forgiveness from this nation instead of honor. He ought to think of the wrong he has committed Debs ought to be asking forgiveness from this nation instead of honor. He ought to think of the wrong he has committed against the thousands of railroad men in this country, who followed him to their own destruction, instead of traveling about the country taking their halves of dollars for the permission to see him, and hear him tell his tale of wee. Away with false notions of heroism. Let us be sane in respect to our country and discriminate between the true hero who saves our country and the Anarchist who attempts to destroy it.

and gold inds its way into the pockets of the owners.

The greatest good to the majority is the thing to be regarded after all, so the fover of nature must go his way nursing his regrets, while the busy populace re-joices over the prospect of new business life for Los Angeles, and an ample sup-ply of fuel for the future of its manu-facturers.

ply of fuel for the future of its manufacturers.

Nature has shown her preference for California even in the oil which she has deposited in her breast, for it is of a better quafity than the best, it is said, that is yielded by the Pennsylvania oil wells, and ought to be of more than ordinary commercial value. It is but another thing added to our rapidly developing resources, the value of which we have searcely begun to realize. But this oil find may be regarded as another index of our future, and it points to the prospect that Los Angeles is destined to become one of the biggest and, most prosperous cities on this slope. Its metropolitan character is already established, though it has only begun to take on the magnificant growth which the future will see fully established. It is the city of California's future, the Mesca to which Eastern pilgrims and homeseekers will flock, and beyond the oil district it will ultimately be built up as one of the handsomest residence cities of the continent.

the Editor of The Times.) Permit me to express in decided terms my hearty approval of your editorial in today's Times, "The Scarlet Woman." I like to see real evils faced and rebuked, instead of ignored. Your last paragraph certainly suggests one step, at least, toward remedy—that remedy suggested as the only one by Dr. Napheys, who said: "Reform the Men!"

Another important side to this question is that of the fallen women being allowed at windows on public streets, insulting the passers-by. Oh! the shame of it! Never shall I forget the disgust experienced when, in San Francisco, a few years ago, lately arrived from the East, I had occasion, in broad daylight, to pass through one or two of those streets where the first names of these women are conspicuously displayed upon the doors, and where the women themselves are so conspicuously displayed upon the doors, and where the women themselves are so conspicuously displayed upon the doors, and where the women themselves are so conspicuously displayed, close by the haif-open shutters. If such a thing exists in Los Angeles, either morning, afternoon or evening, banish it, at the very least, from the sight of chance visitors! More than that, banish it for the sake of your own city's good, and for the sake of your inhabitants!

A Woman of Sense.

LOS ANGELES, April 3.—(To the Editor of The Times:) I watch with a great deal of interest the appearance of the deal of interest the appearance of the cartoons in your valuable paper, for the reason that they seem to bit the nail on the head every time.

I am a woman suffragist; that is, I believe women deserve, and should have, the right to vote, as well as many of the men who exercise that privilege. Whether it will pay them to do so, descending from their high position to mix in politics, is still open to argument. I want to thank you for the cartoon, which, under the heading of "No Wonder She Kicks," appeared in last Sunday's issue. It shows that you are fair to both sides of the question, and, while your artist does not thesitate to assail the weak points in the armor of "fakers" among women (and their name is Legion, who, like the "walking delegate," espouse a cause for "what there is in it," he still sees clearly that the true woman has qualities which make her the companion and equal of man.

Very respectfully. AN ONLOOKER.

As to Ducks.

SAN PEDRO (Cal.,) April 2, 1895.—(To the Editor of The Times:) I see by your paper of today where some local sportsman wants protection for the wild game. He had better learn something about the wild duck before he wants protection. On March 15 the law did the whole thing, and our noble sport has it that there are thousands of young ducks murdered, and all hatched out in seventeen days. He has failed to tell us where the wild ducks bought their incubator, or how in 'he world did they hatch out in seventeen days. It takes four weeks to hatch young ducks. It is too bad if the Supervisors will not help him out to have plenty of ducks for next winter, when he can go into some pasture field where he will have a duck herder to corrait the ducks so he can murder them, because he belongs to the Gun Club of Los Angeles. For thirty-five years i have been hunting ducks in all parts, and I never saw a place like Los Angeles, where a stranger cannot go out for a day's hunting, when there are a hundred chousand million of ducks that never will be killed; but still we must do without hunting because we do not belong to the club. Now, for the good of all the sports, I hope there will be no ducks to be murdered for the next five years to come.

Respectfully yours, a hunter from away

Sweet Potatoes from Slip Seed.

Sweet Potatoes from Slip Seed.

(M. H. Beckwith in Garden and Forest.)
In many parts of the Southern States the
growers of Irish potatoes find that they
have the best success with that crop when
second-crop seed is used. The potatoes are
planted early in the season, and when mature the tubers are planted and a second
crop produced. This second crop, which
matures late in the fall, is in great demand for planting the following season, as
the tubers produce strong, healthy plants,
which yield much more abundantly than
do those of the first crop when kept over
for seed.

Growers of sweet potatoes in Virginia
find that by using what is known as "slip
seed" they are able to secure a much
larger crop of roots, which are of much
better quality than those from the seus
ordinarily used. It is also claimed that the
use of slip seeds produces crops that are
free from injury by the disease known as
black shank.

Slip seed is grown from cuttings about
six inches long taken during the latter part
of June or the first of July from the vines
in the fields. These cuttings are at once
planted in the same manner as are the
rooted plants which are used earlier in the
season for the main crop. The cuttings
produce tubers which compare favorably in
size and yield with those grown from sets,
and when used as "seed" these tubers produce a greater number of stronger and
healthler plants than those grown from
rooted plants earlier in the season. The
demand for this seed is increasing every
year, and-the production of this slip seed
is becoming quite an industry in many sec-

by decreased vitality. Cod-liver Oil is the natural remedy for decreased vitality, but to prescribe plain oil to one whose digestion is impaired is likely to aggravate the difficulty. But there is a way to take Cod-liver oil and aid digestion at the same time.

This way is Scott's Emulsion of Cod-liver Oil with Hypophosphites of Lime and Soda. Scott's Emulsion not only presents Cod-liver oil in a palatable and easy form, but the Hypophosphites are themselves an aid to digestion and a remedy for the nervousness of many weak, emaciated persons.

Today Receiver Weiker of the Santa Fe, and family, will speed to Phoenix and from thence go south over the Sonora line. Col. McCook is still at Coronado and it has not been definitely settled when he will return East. With the reorganization of the finances of the Santa Fe system changes and improvements of various kinds will be made in the affiliated roads. The first of these, and which is beneficial to Los Angeles, is the centering in this city of all the passenger business of the Atlentic and Pacific. Until quite recently this branch of traffic was divided between San Francisco and Albuquerque, but is now under centrol of J. J. Byrne, who is general passenger agent for the Southern California and also the Atlantic and Pacific. This entails much additional work in the passenger department and when Mr. Byrne returns from the East an increase in the office staff will be made.

THAT WINE RATE.

THAT WINE RATE.

The Southern Pacific have had a regular rate of 75 certs on California wines to Chicago and western points, and recently the Southern California fell into tine and announced an advance from the 50 cents that road had been making to 75 cents, tag on the effect on the 5th inst. The matter appeared to be definitely settled, but difficulties have arisen and the Southern California has rescinded its orders regarding the new rate and will make no change from the rate previously obtaining. This particular rate question is bound to come up before the Transcontinental Association when all the roads concerned will have something to say, and until then the Southern California prefers to stand pat.

The Williams Palace Sleeping Car Company has been organized at Kansas City for the purpose of manufacturing a new car, equal, it is said, an point of elegance and convenience, to the sleeping car now in general use. The company has organized with a capital stock of \$5,000,000, most of the shareholders being Eastern capitalists who are heavily interested in railroads and railroad machinery. The most writking feature about this new car is the berth, which disappears into the side of the car at the will of the passenger, and is confined in a space of 17-8 inches. Air mattresses will be used, and the bod-clothing is disposed of in lockers underneath the seat of each section. The berths will be made of steel and aluminium.

FOR EASTER DECORATIONS.

FOR EASTER DECORATIONS. FOR EASTER DECORATIONS.

A very notable shipment was made yescerday over the Southern California road to Chicago. The first carload of cut flowers ever sent East was forwarded by the Cantral Park Floral Company, assigned to Kennicott Bros., at Chicago, who are probably the most prominent wholesale florists in the country. The consignment consisted of about 30,000 calls libies, carnations and ferns, the whole being carefully packed in a refrigerator car. Should this shipment arrive at its destination in good condition, and there is no apparent reason why it should not, as flowers have been on many previous occasions shipped in small quantities to England, a new outlet for the delightful and odorous products of California will be assured.

A CUT IN CAR RATES.

A CUT IN CAR RATES.

On the first of the month a heavy cut in refrigerator car rates was made by the Fruit-growers' Express, of which the Armours are the head and front. The cut has not affected focal growers, as it applies more particularly to deciduous fruits. From Fresno and other points adjacent the rate to points between Denver and Chicago, both inclusive, was \$150, but now is only \$115. To New York and vicinity a reduction has been made from \$220 to \$155; to Beston and New Orleans from \$225 to \$155; and to Cleveland, Pittsburgh, and as far south as San Antonio, from \$175 to \$140.

The rates on oranges still remains \$60 Missouri River points; \$75 to Chicago ad St. Louis, and \$90 to points east of

LOS ANGELES RAILWAY COMPANY.

At a meeting of the board of directors of the Los Angeles Railway Company, succeeding the Los Angeles Consolidated Filectric Railway Company, held in San Francisco on Tuesday, Fred W. Wood of this city was elected general manager to take humediate charge of the property, consisting of twenty and one-half miles of cable lines, thirty-eight and one-half miles of cable lines, thirty-eight and one-half miles of electric lines and about mine miles of horse lines. E. P. Clark, to whose skillful and untiring effort the property has been brought, under great difficulties, to its present service, presented his resignation at the same meeting. Mr. Clark has been asked to remain with the company for a time in order that the new management may have the benefit of his intimate knowledge of the property and of his assistance in solving the many important matters under consideration, such as purchase of new equipment, electrising cable lines and the like. Mr. Clark has other large interests to which the will soon turn his entire attention. Mr. Wood is an old citizen of Los Angeles and is well known. His connection with the Temple-street cable property has made that line a paying one.

He is also prominently identified with other large business interests, but will so arrange his other connections as to give his entire time to the management of the Consolidated property. Morris Trumbuli of Chicago, who has been in temporary charge of the lines, will turn the control over to Mr. Wood today and return to his business in Chicago within the next week or ten days. The boy took the suit to the tailoring establishment of Oliver Boyd, on Fourth street, between Spring and Broadway. The clothes were returned in about an hour, but when the man looked for his money it was gone. The bell boy was at first suspected and the guest complained of his loss to the manager of the hotel, who immediately telephoned to the police station for a detective. Detective Bradish responded to the call and placed both the bell boy and the tailor under arrest.

The boy was rigidly cross-examined by Detectives Bradish and Goodman, who finally came to the conclusion that he was innocerd. Meantime, Boyd, the tailor, had been locked up in a room allotted to the reporters in the police station. He was next taken in hand by the detectives. At first he indignantly denied his guilt and said it was an outrage to arrest an honest tradesman on so serious a charge on no evidence except the testimonyof a stranger and a bell boy.

The detectives, however, informed him that they had conclusive evidence that he stole the money, and that he would get off a great deal easier by confessing the theft. At last Boyd became convinced that the detectives had proof of his crime and confessed that he had the money.

The money consisted of bills, but Boyd had exchanged two twenties for silver and gold, all of which, except \$1.50, which he had spent, was in his pockets. The rest of the bills, amounting to \$60, he had hid among some crap and roulette tables

Paine's celery compound has played a most important part in the lives of thousands of young people in every section of this country. Many whose nervous systems had been so stimulated as to unfit them utterly for study, it has made vigorous and strong enough to ably bear the burden of coming years. It has enabled them to grow up vigorous men and women, capable of doing the part of active, strong men and women in the world. Mr. James B. Wetzel, writing from his home in New Berlin, Pa., says:

"Allow me to speak a few words in praise of Paine's celery compound. My younger sister, whose picture I send you, was subject to nervous attacks, and, we thought, to heart trouble. We tried numerous mediciness for her aliments, but without much avail. Last winter she had a severe attack of nervous trouble with her eyes, and we gave her Paine's celery compound, and she improved wonderfully upon it, and she has been well ever since. #### A Few Changes Made in the Fire Department.

Council Makes Pools on Wired Re ports Illegal, but not on Local Events.

Judge Shaw Has Decided an Impor tant Question Relating to Execution Levies-Wong Chee Admitted to Bail.

The City Council yesterday passed the final ordinance calling a bond election for parks and other purposes for Friday, May 3. An ordinance was adopted prohibiting pool-selling except on local events. The Fire Commission made some changes in the personnel of the department and referred the fire-glarm propoment and referred the fire-alarm prope received from M. P. Thye to a committee. Two Chinese gamblers were fined \$100 each upon conviction for running a fan-tan game, and Wong Chee was admitted to ball in the sum of \$10,000 pending his trial for the murder of Loo Suey. Little of interest was done in the civil courts.

which to submit to electors the question of the issuance of bonds for parks, headworks for waterworks and other purposes was finally determined by an ordinance passed by the City Council yesterday. The Council met at 2 p.m. in adjourned session. All the members were present except Murson and Snyder.

The Building Superintendent presented plans for the proposed library building to be erected at Central Park, should the bonds for that purpose be voted. The plans, which are merely in the rough, they being presented for approval as a matter of form in order to comply with the law, were approved. The plans contemplate a two-story building in mission size.

A final ordinance was adopted calling a bond election for May 3. The bond times to be proposed at this election are as follows: Elysian Park, \$100,000; Westlake Park, \$35,000; East Side Park, \$25,000; land for headworks for a waterworks system, \$30,000; Horary building, \$50,000; eity Jail, \$40,000; total, \$270,000.

President Teed moved that an ordinance of intention be presented for two flushtanks on the morth side of St. James Park, Adopted.

Councilman Kingery moved that the City Clerk advertise for proposals for filling the excavation in the Sisters of Charity tract in the Fourth Ward, made by the city for gravel.

President Teed stated that if the city were to compel property-owners to fill their own lots the city should certainly fill its lots. The excavation in question had been made on city land and he believed that parties could be found who would fill the lot if they could thereby butain a tille to it.

After only a little further discussion the motion to adopt the recommendation of the Board of Health prevailed.

The City Attorney presented an ordinance, as directed, prohibiting pool-selling, except on local events. The ordinance was drawn to take effect April 15, and the body of it was as follows:

"Sec. 1. It shall be and is hereby

ared, unlawful for any person, either as owner, agent or employee, to conduct or carry on, or in any capacity to assist in carry on, or in any capacity to areist in carrying on the business of a 'poolroom,' or to conduct, or to assist in conducting, the business of 'making books' or selling pools on races or other contests, within the corporate limits' of the city of Los Angeles; provided, that this ordinance shall not prohibit 'making books' or 'selling pools' during race meetings on horseraces run or conducted on any track or ground, all, or any portion of which, is within the corporate limits of the city of Los Angeles. geles.
"Sec. 2. A poolroom is defined to be a

room or place where betting or laying of warers upon the result of races or contests is carried on as a business."

The maximum penalty for a violation of the ordinance is a fine of \$500 or an imprisonment of ax months in the City Jail, or both. There is no minimum penalty stated.

Councilman Kingery said that he did not know whether it was best to pass the ordinance in that form.

Councilman Kingery said that he did not-know whether it was best to pass the ordinance in that form instead of prohib-iting selling pools on local events also. President Teed expressed himself in favor of permitting the selling of pools on local events. He thought that if this were not done the ordinance would prac-tically put a stop to racing in this part of the State. It would virtually have the effect of building a Chinese wall about the city.

effect of building a Chinese wall about the city. Councilman Savage said he supposed there was a good deal of opposition to the ordinance on the part of the Western Union Telegraph Company. He had been informed that that company was receiving \$114 per day for messages sent from East-ern events.

The ordinance was adopted without mendment and by a unanimous vote.

That M. D. Johnson be permitted to bore for oil at Third and Figueroa streets. This last communication met with decided-opposition. Capt. John Cross urged that the location of the oil-boring apparatus be not at present extended further into the residence localities. If the members of the board could only have been at his home Tuesday night and smelled the suffocating odor that he was compelled to breathe there would be no doubt as to their action in the premises.

The matter would probably be taken into the courts within a short time, and he asked that action on the question by the board be at least temporarily deferred.

Action on the recommendation was post-poned for one week.

The Chief reported for confirmation as members of the department the following-named calimen: J. P. Jacobs, S. B. Hall, Walter Lipps, George W. Cornart and C. P. Harrison. The men named were appointed.

From Charles Prager, asking permission to erect and maintain a laundry on Washington street, north side, west of Main street.
Applications of R. W. Burns, Frank L. Anderson and Roy Winser for positions on the department were filed.
The proposition of ex-City Electrician M. P. Thye as heretofore presented, offering to keep the city fire alarm system in repair for a certain period for \$125 permonth, was presented as referred from the City Council.
Commissioner Vetter suggested that an examination be made of the expenses of the fire alarm system for the part year or more. After so doing the board would be better able to judge of the merits of the proposition.
Chief Moore was asked in reference to the efficiency for his position as shown by Mr. Francis, the present electricians und and electricians and did not wish to take part in any fight between electricians such as had been going on for the past ten an electrician and did not wish to take part in any fight between electricians such as had been going on for the past ten years. appeared to be doing his work very well. There had within the past few lays or so been a good many taps on the City Hall bell when no alarm had been furned in, but this appeared to be due to the fact that there had been several cames of moving buildings where breaks in the lines were occasioned thereby.

One fire alarm box in the southwestern portion of the city failed to work a few days ago and the alarm was sent in by telephone instead. He had the City Electrician investigate the matter and it was reported by him that the box had been "cut out." The electrician put it in proper repair again and tested the box by turning in an alarm from it. The box then operated properly.

Mayor Rader said that he did not believe that it would be good policy to "farm out" such a branch of the public service as the city fire alarm system. The Mayor jokingly went on to say that if this were to be done the next thing would be some one would offer to fulfill the duties of Mayor of the city for \$5 per year.

the duties of Mayor of the city for \$5 per year.

Continuing, the Mayor said he had understood that Mr. Francis had been somewhat handicapped by Mr. Thye and some of those who had been his (Thye's) subordinates taking away maps and other articles connected with the system and had declined to give information in reference to its workings, the result being that the present electrician had in some instances been put to the necessity of going to a good deal of difficulty in order to find out things for himself. In this and in other small particulars the present electrician had been annoyed a good deal in keeping the system in order.

Commissioner Botts opposed the proposition submitted, saying that if it were to be entertained perhaps some one could be found who would "go Mr. Thye one better."

The matter was finally referred to a committee consisting of Commissioners Vetter and Grider and the Chief; the committee being named by the Mayor.

After the approval of the usual budget of demands the board adjourned.

### Board of Health.

AGAIN THE QUESTION OF COUNTY HOSPITAL SEWAGE. The Board of Health met yesterday after-noon, there being a full attendance. A number of matters of not a little impornumber of matters of not a little impor-tance were acted on and there were some pointed remarks made in reference to some of the questions under discussion. An application of Anna M. Berner for permission to practice as a midwife, was

swear out a complaint against the people in charge of the County Hospital for maintaining a nuisance. He did not desire to take the initiative in the matter, but this was a case where the matter had been delayed for so long a time that something ought to be done.

A communication was presented from the Weather Observer in reference to a proposition to establish a system of obtaining government health reports somewhat as reports on weather and crops are at present obtained. The proposition contemplates the appointment of physicians and others throughout the country to act as reporters and furnish information as to the climate, the vital statistics and other points which would be of general interest if properly tabulated.

The matter of the collection of garbage was discussed and it was stated that there had been a good many complaints about the west if we have com-

if properly tabulated.

The matter of the collection of garbage was discussed and it was stated that there had been a good many complaints about the way it was being done. The complaints more especially had been in reference to the hours at which it was collected and the time it had, in numerous instances, been permitted to remain in front of houses longer than it should.

Health Officer Steddom stated that there seemed to be some conflict between the ordinance providing for the collection of garbage and the contract under which the work was being done. It had occurred in numerous instances that the people who put the garbage out would mix it with the aches from their places, and it was well known that it was impossible to cremate sches and garbage together.

The question was raised as to whether it would not be well to permit the use of garbage for feeding to swine, but this proposition was objected to by Dr. Kurtz, who said that in a number of cases which had come under his observation the cuspidors in ealcons had been dumped together with the garbage from the came places. He thought there would be a strong probability of danger from tuberculoris being spread in instances of this kind, if the feeding of the garbage to swine were to be permitted.

It was suggested that the board had not

kind, if the feeding of the garbage to awine were to be permitted.

It was suggested that the board had not the making of the contract for garbage collection, and, perhaps, under the circumstances, the best thing for the board to do would be to inform the City Council that the contract was not being complied with to the satisfaction of the board. Action on the matter was, however, deferred.

ferred.
The appointment of a meat and milk inspector was considered briefly, and it was decided to hold a special meeting of the board Saturday evening, in order to examine applicants for the position. For that purpose it was ordered that all applicants be requested to be present at the office of Dr. Moore, No. 222 Bradbury Block, et 8 p.m. Saturday.

The board thereupon adjourned.

IMPORTANT QUESTION OF LAW DECIDED BY JUDGE SHAW. Judge Lucien Shaw rendered his decision resterday afternoon in the case of G. L. Mesnager et al. vs. Mercurial Lugo, which was submitted to him on Tuesday last upor a motion to set aside an attempted execution levy, in accordance with the follow-ing brief written opinion, filed therein:
"The important question arising on the

otion to set aside the execution of levy in this case relates to the character of the state necessary to support a home-stead. Can a valid homestead be declared on land in which the declarant holds only

mon?

"Under the statute as it existed prior to 1868, it was held that it could not. Wolf vs. Fleischacker (5 Cal., 244;) Flitzgerald vs. Fernandez (71 Cal., 504.) The act of 1868 provided that parties owning an undivided interest, but having exclusive possession, should be entitled to the benefit of the law relating to homesteads. Both that act and the prior law to which it refers are now superseded by the prothat act and the prior law to which it refers, are now superseded by the provisions of the Civil Code (secs. 1237 to 1269.) If am cf the opinion that under the law, as it now exists, a homestead may be declared on any land on which the chimant resides, regardless of whether he holds an undivided interest as tenant in common only, or the whole interest in severalty.

in common only, or the whole interest in severalty.

"The effect of the law as it now stands is that she homestead may be selected either from separate property or community property (see. 1238.) and shall consist of 'the dwelling-house in which the claimant resides, and the land on which the same is situated. (Sec. 1233.) There is nothing in the language used which indicates an intention to limit a homestead to property held in severalty. Sec. 1239 declares that it 'may be selected from the community property, or the separate property of the husband, or, with the consent of the wife, from her separate property."

property of the husband, or, with the consent of the wife, from her separate property.

This is very broad language, and clearly includes all kinds of property, as estate in common, as well as an estate in severality.

"Although this exact point has never been decided by the Supreme Court, yet the tanguage of the decisions supports this construction of the code.

"If a chaimant is in possession of and residing upon the land, whatever title he has, whether legal or equitable, is subject to and sufficient to support a homestead." (King vs. Gots. 70 Cat., 241.)

"That which is covered by the exemption is the land, and not any particular claim of the to st. (Perry vs. Ross, & Cal., Dec., 88, 37 Fac. R., 787.)

"Whatever be the character of the little or interest in the sand held at the time of the filing of the declaration, the claim will attach to such title or interest." (Alexander vs. Jackson, 92 Cal., 519.)

"It is true that none of these expressions were used with reference to an exiate in common. They referred to several estates held by imperfect titles, or manifested by possession only, without any title at all.

"But I cannot see why the principle thus declared does not apply as effectually to an extate in common as to any other estate or interest in land. An estate in common comes as certainly within the meaning of the word 'property' as any other estate. The language of the code covers sill kinds of property in land. There is no hint of any restriction or limitation there in that respect. There is nothing either in that respect. There is nothing either in the respect of the effect of a homestead of the defendant is valid even if An application of Anna M. Berner for permission to practice as a midwife, was granted.

The Health Officer was appointed a committee of one to confer with the City Attorney in reference to the advisability of having an ordinance enacted providing that all physicians obtaining lifensee from the Health Office shall in each case pay alicense of \$2 and that for all licensees taken license of \$2 and that for all licensees taken out from that office for other purposes, such as plumbers, ote, a fee of \$1 each shall be imposed.

Dr. Davisson appeared in the matter of the sewering of that portion of Main street formerly known as Kuhrts street. He said that the sawage from the County Hospital is and has been for a number of years running into a natural waterway, meaning the Arroyo de Los Posas. This is something which private individuals would not be permitted to do. There was no doubt that a considerable number of cases of typhold fever had originated from that pollution. He had treated a dozen or more which he was satisfied were due to it. The protest against the construction of the sewer as progosed, which protest had been referred to the board from the City Council, was discussed and it was finally decided to recommed to the City Council that the sewer be built as proposed.

Dr. Davisson stated that a number of years ago it was promised that when there was an opportunity to connect the County Hospital with a sewer it would be done. If something were not done in the near future he would feel it to be his duty to the contraction of the defendant is valid, even if the interest which he has in the land is an estate in common. It will, therefore, be unnecessary to decide whether or not this meaning that a considerable number of cases of the defendant is valid, even if the interest which he has in the land is an estate in common. There is no thing either in the respect to the contraction of the defendant is valid, even if the interest which he has in the land is an estate in common. The effect of a formatical property in l

CHALMS CERE DECEMBER 15 PORGERS

CLAIMS THE RECEIPT IS FORGED. Judge York and a jury were again occupied all day in Department Three yesterday with the trial of the case of P. Levreau vs. H. Clary, an action to foreclose a vendor's hen on a lot at Redondo Beach for \$1900, the balance alleged to be due on the purchase price.

a vendor's hen on a lot at Redondo Beach for \$1900, the balance alleged to be due on the purchase price.

The defendant claims that he paid Levreau the money, and produced a receipt purporting to be signed by Levreau, in full of all claims and demands arising out of said sale; but the signature thereto, which consists of the initials "P. L." only, and the words "Gardena, Cal." are deneunced by the plaintiff as a forgery. The case has therefore resolved tiself into a question for the jury to determine which of the two men is telling the trüth. Experts on handwritting are unable to tagree as to whether or not the signature to the receipt is genuina, some holding that it is, while others are equally positive that it was written by the same person who wrote the body of the receipt, which is admittedly in Clary's handwriting. The case will be taken up sgain this morning, and will, in all probability, reach the jury today.

THE SECKER MURDER CASE.

The second trial of the Secker murdet ase was resumed before Judge Smith and occupied their undivided attention all day. Nine witnesses were examined for the prosecution, which, thereupon, rested its case, and Mrs. Annie Secker was examined on behalf of the defense. No new evidence was introduced, the facts of the case having been so fully gone into at the first trial as to leave no room for additional testimony. The defendant Secker will probably be called upon to reiterate his version of the tragic story for the benefit of the new jury this morning, and the chances are that the case will reach the jury either late this evening or early tomorrow.

Wong Chee, the Chinese "boss," charged with the murder of Loo Suey, was yesterday admitted to bail by Judge Smith in m of \$10,0

the sum of \$10,000.

In Department One yesterday morning quan Suey and Gin Yot, two Chinese gamblers recently convicted of conducting a fan-tan game, appeared before Judge Smith for sentence and were fined \$100 each, with the alternative of fifty days imprisonment in the County Jall.

Judge Clark heard the case of J. H. Luensman vs. F. W. Luensman, administrator, an action to quiet title to forty acres of land in section 19, township 2 south, range 13 west, yesterday afternoon, and ordered a decree for the plaintiff therein, as prayed.

terday ordered a decree for the plaintiff, as prayed.

The trial of the case of the Los Angeles Farming and Milling Company vs. C. S. Thompson et al., an action in ejectment to recover certain lands in the Lankershim ranch, was resumed before Judge Van Dyke and a jury yesterday, and, after occupying their attention all day, went over until this morning.

The petition of L. R. Tighiman for an order compelling J. H. Carter to turn over aft the books and papers pertaining to the office of treasurer of the Big Rock Creek Irrigation District to him, was denied by Judge McKinley yesterday, and the citation issued therein was dismissed.

Judge McKinley yesterday morning rendered his decision in the case of E. J. Calley vs. G. P. Dutton, an action to recover \$475 alleged to be due on an assigned claim for a soda-water fountain purchased by Dutton, findings and judgment being ordered for the plaintiff therein.

New Suits.

Among the documents filed with the County Clerk yesterday were the preliminary papers in the following new cases:

Jose Anduaga va. J. B. Davies et al., action to recover judgment for \$550 and interest, alleged to be due on two promissory notes.

John Borohard vs. W. H. Rosch, action to recover \$3000 and interest, alleged to be due on a promissory note.

Depot Railway Company vs. M. H. Sherman et al., action to recover certain personal property, or its value \$861.25, and for \$346.25 damages.

Emily A. Billings vs. Omri Bullis, action to recover \$492.48, alleged to be due on a deficiency judgment.

Joseph F. Chambers, for eight years clerk of the City Police Court, during Judge Austin's incumbency, and well-known to all crooks of all descriptions, owing to his official capacity, enjoyed immunity from their practices until Tuesday afternoon when his house at No. 120 East Thirty-sixth street, was robbed during the absence of the family. The thief or thieves got away with about \$300 in money and jewelry. Detective Goodman made cne arrest on suspicion, but it did not prove to be of the right party.

The residence of Mrs. Stassforth at No. 209 North Broadway was entered by burglars Tuesday evening between 9 and 10 o'clock, while the members of the family were out. Entrance was gained by breaking in the back door. A quantity of jewelry, including a watch and chain, was stolen. Detective Goodman is working on the case.

good lasts. Once used, they are always in favor. Being composed of the choicest, concentrated veyetable extracts, they cost much more than other pills found in the market, yet from forty to forty-four are put up in each sealed glass vial, as cheaper made pills.

"Pleasant Pellets" cure biliousness, sick and bilious headache, dizziness, costiveness, or constipation, sour stomach, loss of appetite, coated tongue, indigestion, or dyspepsia, windy belchings, "heart-burn," pain and distress after eating, and kindred derangements of the liver, stomach and howels. PRESBYTERIAN CHURCH MEETING. The annual meeting of the board of trustees of the Presbyterian Church met Tuesday evening in the vestry, and reported upon the work done by the church in its various branches in the past year, and elected officers for the ensuing year. It was shown by the financial statistics presented that the sum of \$7699.01 had been paid into the church treasury from various sources during the year, \$7319.38 disbursed, leaving a cash balance of \$479.18. The secretary of the Woman's Home and Foreign Missionsry Society showed that goods and money amounting to \$375 had been piedged and given away during the year, and W. B. Bryam of the Y.P.C.E. swelled the charity fund report by the contribution of \$45 sent to the foreign missions, and \$25 to home. mission work. The Sunday-school contributed \$393.66, and gave away \$123.41. Officers were elected as follows: Messrs. McCormick, Picher and Dishi were elected elders, and F. E. Bolt, C. S. Cristy, E. L. Farris, C. B. Thomas, H. M. Litts, Washington McClintock and George W. Stimson were chosen trustees.

Other Local Notes.

SANTA MONICA, April 3.—(Special Correspondence.) The articles of incorporation were filed with the County Clerk yesterday establishing the Los Angeles and Santa Monica Electric Railway Company. The projectors and incorporators are: C. B. Van Avery, V. H. Raleigh, J. J. O'Brien, A. W. Eames and James P. Montgomery. The capital stock is fixed at \$500,000, divided into 5000 shares at \$100 each. O' this \$50,000 is subscribed.

This proposed line is separate and apart from the bicycle road promoted by Maj. Barrett, which it is understood will be backed by abundant Eastern capital. This rather unique style of road is to be operated upon a single rail, with guard rail above. A similar line is now in operation on Long Island. It has a speed possibility far exceeding a mile a minute, and has tested movement of cars at expenditure of less than seven pounds of coal percar per mile. A passenger coach accommodating 110 persons weighe only five tons. The service is quick, safe and economical for both passengers and freight. Maj. Barrett claims that the company organization will be perfected and the right-of-way agents in the field within thirty days. Santa Monica will be the opening terminus, where work will begin, and the line from the shore to Los Angeles will be in operation within a year. Down this way the unanimous hope is that all these

Maj. A. M. Thornton, treasurer of the Pacific branch, N.H.D.V.S., at this point, has been suspended from his duties, and Capt. F. K. Upham has been assigned temporarily to the place. The charges upon which the National Board of Managers base this action are understood to have been preferred by Gov. J. G. Rowland and relate exclusively to matters of judgment on the part of Maj. Thornton in the discharge of his duties as commissary. There is no suggestion of dishonesty upon the treasurer's part, but there has been as growing difference of opinion between the officials upon matters of management. Maj. Thornton will demand an early and thorough investigation, for which purpose the board of managers will undoubtedly be convened at the home here.

REDLANDS. April 3.—(Special Correspondence.) The hotel Terracina, its contents, and property of its guests, were destroyed by fire about 4:30 o'clock this morning. When the cook came down stairs at that time he discovered a fire in a pile of wood near the hotel. The alarm was given, but within a few minutes the building was ablaze. It burned like kindling and was a total loss in less than an hour's time.

thirty people all told. It was only by rushing from the building in their night-clothes that the lives of the inmates were saved.

The cause of the fire is not known. The Terracina was built in the winter of 1888 by the Terracina Hotel Company, and cost \$32,000. About a year ago the property was purchased by Mrs. Elizabeth H. Melcaer of San Francisco. The building was insured for \$9000, and the furniture for \$3000.

C. W. Hinchcliffe, assistant general superintendent of the Sunset Telephone and Telegraph Company, Los Angeles, was here today. The company has decided to provide Redlands with the express system, which is the best telephone system now in use. At present there are about sixty subscribers in Redlands; if the company can procure one hundred subscribers a night service will be put in.

Water Company's Affairs — Better Protection from Fire.

RIVERSIDE, April 2.—(Special Correscondence.) The affairs of the Riverside Water Company are in a tangled state. Some weeks ago a receiver was appointed for the property and today an important suit was filed against the company. In which A. S. White, J. F. Houghton and A. Keith, trustees, ask that all the property of the company be turned over to them under a trust deed which covers all the property of the company. The action is brought under a certain trust; deed executed by the company to the frustees in 1885 as security for payment of the principal and interest of the fight series of bonds of the company, amounting to \$200,000. As further cause of action a second deed of trust was executed in 1888 to secure the payment of the second series of bonds amounting, to \$150,000 is cited. The second deed covers additional property not covered by the

THAT AWFUL SMELL.

It Came from an Oil Refinery and is Healthy.

Healthy.

It was briefly noted in this paper yesterday that a bad smell had permeated the city the night before between 10 and 11 o'clock. The odor was simply awful and sickened many people who were abroad at that time. It was thought by some to that time. It was thought up flushing, and to others it seemed to be escaped illiminating gas from some fractured main. It was noticed in all parts of the city and even awoke some people from sound sleep and gave to others an undesirable period of wakefulness. There were tele-phone queries to ascertain the cause of the awful odor, but no explanation of it

phone queries to ascertain the away does not be away door, but no explanation of it was forthcoming.

Yesterday the truth was learned. The strong, nauseating and all-pervading perfume had emanated from the refinery of the Oil Burning and Supply Company, situated on the Southern Pacific track, near Naud's warehouse. It appears that by the accidental bursting of a pipe leading from the still to the furnace, at the refinery, the noisome gas which is ordinarily consumed, was permitted to escape into the night and spread all over a city which should be free of such offence.

A visit to the refinery elicited the fact that when the plant is running properly the foul-smelling gas for the crude oil is carried by pipes into the fire-box and is consumed, thus destroying its offensiveness, but on the night in question the uncondensed vapor from the still escaped and turned the stomachs of many citizens until they wished for death.

caped and turned the stomachs of many citizens until they wished for death.

It will be a relief to some to learn that the smell, instead of being sewer gas, was something quite healthy in comparison, though not at all agreeable.

#### SUED FOR WEDDING PRESENTS A Case of Domestic Infelicity with New Variations.

time is suing him for a divorce in the Superior Court. The other defendants are
the parents of Mrs. Wolfrom, with whom
she is now living, having separated from
her husband some time ago, she alleges,
on account of cruel treatment.

It seems when Mrs. Wolfrom left her
husband's bed and board she took with her
a variety of household articles, most of
which were wedding presents, and which
the husband claims are his as much as
hers. In the list are two crayon drawings,
one of a lion and the other a lioness, which
form a large part of the bone of contention. There are also a silver-plated cardcase, a spoonholder, butter dish, knives,
forks, spoons, glasses, pillows, blankets
and a dozen and a half chickens.
The plaintiff values all these articles
at \$200, and sues for their recovery or the
value thereof, and \$50 damages for being
deprived of their possession.

The court listened to a mass of testimony
yosterday as to who presented the various articles, and who should most rightfully
possess them. Attorney Valentine argued
the case for the plaintiff and Col. Guthrie
made a strong pies for the defendant.
The court reserved decision.

One peculiarity about the case is that
some of the articles sued for were presents
from the husband to wife, which he now
seeks to recover.

There is shown at the left in the picture below a between-reason street gown of black and red bouole silk, whose moderately-wide skirt is trimmed with black velvet tabs of graduated lengths. The bodice has crossed-over fronts, fastening with steel buttons and shoulder straps of the boucle silk, the back being of plain black velvet with a boucle silk yoke. The standing collar is of volvet, garnished with red chiffon rosettes, and the sleeves have boucle silk puffs and velvet cuffs ornamented with straps of the former material. Besides this there is shown a gray cloth gown, its skirt showing panel of fine green and red velvet plaid on the left side. Over this come cloth straps fastened with steel buttons. The waist is made entirely of the plaided velvet and is laid in box-pleats in front, buttoning in the center with three box-pleats in the back. Its sleeves of plaid velvet end in slashed cloth cuffs fastened with buttons, and the velvet standing collar has gray chiffon rosette garniture. Satin of two contrasting shades is shown in combination with velvet of still another shade in a very handsome gown, so it looks as if the time of rag-bag rigs was not over yet awhile, and that, in spite of apparent extravagance, the cunning woman may after all practice economy.
